PROJECT: POLAND

STUDY PHASE 2.5

MANAGEMENT PRESENTATION

STAT The Position Language Development project (POLAND) evolves around Headquarters Regulation (Language Development Program). This program is administered by the Language Development Committee which consists of representatives from each of the Directorates and the Offices of Personnel and Training.

Currently this project consists of the Language Control Register and associated language requirements incorporated in the Position Control Register, both were designed by Manpower and Personnel Branch/OCS personnel with their interpretation of HR STAT The design was presented to and approved by the Language Development Committee on 17 June 1969 (see attachment which includes minor modifications). At that time the Language Development Committee indicated the designation of language positions by all Directorates would be completed by 1 September 1969. Unfortunately, the completion date has been readjusted many times since then.

As of 3 March 1970, only one Directorate's, the DDI, list of language designated positions has been coded for inclusion in the

Position Control Register. DDS and DDP have recently submitted their list of language designated positions to Position Management Control Division/OP. It is anticipated that these positions will be coded and included in the Position Control Register in April. The DDS&T and DCI do not plan to designate language positions.

The initial Language Control Register, which will include DDI positions/personnel only, is expected to be produced in March 1970.

It is expected that refinement of the existing system will take place when (1) the Language Control Register and Position Control Register have been produced for all Directorates, and (2) all Directorates analyze the reports and submit their recommendations for changes to the Language Development Committee for review and concurrence. It is difficult, if not impossible, to project the date of refinement since it has taken eight (8) months to receive all the Directorates' requirements.

Due to the fact that no reports have been published to date and the ultimate refinement is unknown, the results of the POLAND study phase are inconclusive. The Language Development Committee does not presently know what personnel assignment controls, if any, will be incorporated in the new POLAND project since the current system is in a state of flux and is currently not in operation.

It is recommended that one of the following approaches be taken with the POLAND project:

A. Assume that the current system will remain stable and incorporate these requirements in the new Staffing System.

B. Defer any further study/analysis on the POLAND project until all Directorates receive and review their copy of the Language Control Register and the Language Development Committee dictates what new requirements and controls are necessary.

The program calls for determining requirements for foreign language competence, training and testing personnel, and maintaining necessary records.

b. **DEFINITION.** For the purposes of this regulation professional positions and personnel are those so identified in the subcategory codes of the Occupational Handbook of Position Titles and Codes published by the Office of Personnel.

c. **POLICY**

- (1) Each organizational unit which needs language-qualified personnel to carry out its mission will be called, for the purposes of this regulation, a Language Unit. Such a unit may be of any size or at any level of organization (section, branch, staff, base, station, or other). For each Language Unit will be recorded the languages needed, the number of requirements at each level of proficiency, and the minimum number of language-qualified personnel needed to satisfy all the requirements.
- (2) A Language Unit's language requirements may be either specific or general. Specific language needs are those identified with particular positions, to be called Specific Language Positions. General language needs are those which can be satisfied as long as there is an adequate pool of language qualified personnel in the unit. Certain positions will be identified as General Language Positions. Not everyone assigned to a General Language Position must have language competence but among the personnel so assigned there must be enough language qualified personnel to give the unit a sufficient inventory of language skills to meet the requirements recorded in accordance with subparagraph c(1) above.
- (3) By 1 January 1971, unless a waiver is granted in each case by the Deputy Director concerned:
 - (a) Any employee occupying a Specific Language Position must have a tested proficiency in the required language at the required level, and
 - (b) Any new assignee to a General Language Position must have a tested proficiency in a language and at a level which fills one of the unit's general language needs if any of those needs is unfilled.
- (4) An employee's proficiency test score in a foreign language is considered valid for three years only, unless:
 - (a) The employee is stationed in a country where the language is the primary language,
 - (b) The employee uses the language regularly in his work, or
 - (c) The employee has previously been tested and has demonstrated a native level of proficiency in the language.
- (5) All professional employees in headquarters on 1 January 1971, except those who are to retire within five years, must have valid test scores for the foreign languages in which they claim any degree of knowledge.
- (6) All newly hired professional employees will be tested for language aptitude. When a new employee is determined to have knowledge of a foreign language, his proficiency will be tested.
